

kn_auto_backup Module guideline

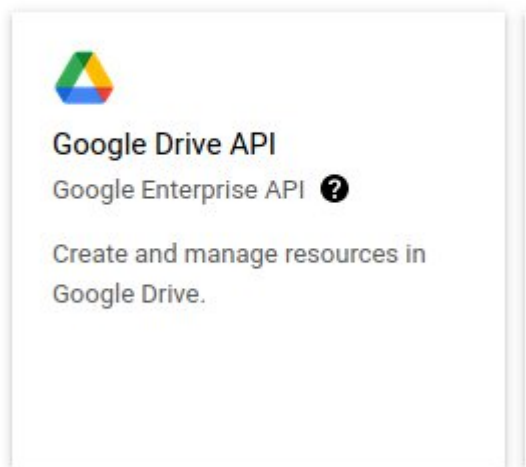

Google Drive's settings:

- When signed in Google's website, access this url :
<https://console.cloud.google.com/home/dashboard>
- If you have no project or you want to create a new one then create it step by step.
- After you have a project, select the project and navigate to "Explore and enable APIs"

- Click on "ENABLE APIS AND SERVICES" button and navigate to "Google Drive API" and click "ENABLE".

Google Workspace

- Navigate back to [dashboard](#), click “Create credentials” and select “Service account” and fill all necessary information.
- Navigate back to [dashboard](#), click to the newly created service account, navigate to “Keys” tab and create a new key with the key type is “JSON”, a file with json format will be downloaded.

LOGS

Keys

 Service account keys could pose a security risk if compromised. We recommend you avoid downloading service account keys at Cloud [here](#).

Add a new key pair or upload a public key certificate from an existing key pair.

Block service account key creation using [organization policies](#).
[Learn more about setting organization policies for service accounts](#)

ADD KEY ▾

Create new key

Upload existing key

Key	Key creation date	Key expiration date	
d4ddf765fd51459cb066e8aeb61153ce7f3f629f	Aug 7, 2023	Jan 1, 10000	

- Rename the json file to “service.json” and place it into the module folder.
- Navigate to [Google Drive](#), create a new folder on it and share it to the service account, make sure it can edit the folder.
